

Product 1 — FOODS_3_069 | Fresh Whole Turkey

Field	Value
Department	FOODS_3
Stores	All 10
Total sold (5 yrs)	~35,600 units
Avg units/day	18.6
Seasonal CV	1.25 (highest in dataset)
Zero-sales days	3.5%
Peak month	December — 92.3 units/day
Trough month	September — 6.6 units/day
Peak/Trough ratio	14x
Price range	Data available

Monthly pattern:

Jan:15 | Feb:13 | Mar:9 | Apr:10 | May:8 | Jun:7 | Jul:8 | Aug:8 | Sep:7 | Oct:12 | Nov:37 | Dec:92

Event impacts:

- 🔥 Thanksgiving: +517% (115 units vs 19 normal)
- ✅ Valentine's Day: +92%
- 🏠 Memorial Day: -71%
- 🏠 Christmas day itself: -100% (stores closed)

Story: Sells almost nothing Jan-Sep, then explodes in November (Thanksgiving) and peaks in December. The most dramatic seasonal arc in the entire dataset.

Product 2 — FOODS_1_206 | Halloween Candy

Field	Value
Department	FOODS_1
Stores	All 10
Total sold (5 yrs)	~30,200 units
Avg units/day	15.8
Seasonal CV	0.64
Zero-sales days	0.6% (sells almost every day)
Peak month	October — 49.2 units/day
Trough month	January — 10.1 units/day
Peak/Trough ratio	4.9x

Monthly pattern:

Jan:10 | Feb:13 | Mar:14 | Apr:14 | May:13 | Jun:14 | Jul:13 | Aug:12 | Sep:15 | Oct:49 | Nov:12 | Dec:11

Event impacts:

- 🔥 Halloween: +1,497% (245 units vs 15 normal) — highest spike in entire dataset
- 🏠 Thanksgiving: -65%
- 🏠 Christmas: -100%

Story: Perfectly flat all year at ~13 units/day, then a single month (October) explodes to 49 units/day with a +1,497% Halloween spike. The dearest single-event product in the dataset.

Product 3 — FOODS_1_123 | Fresh Strawberries

Field	Value
Department	FOODS_1
Stores	All 10
Total sold (5 yrs)	~15,500 units
Avg units/day	8.1
Seasonal CV	0.51
Zero-sales days	21.7%
Peak month	December — 14.5 units/day
Trough month	July — 1.5 units/day
Peak/Trough ratio	9.6x

Monthly pattern:

Jan:10 | Feb:13 | Mar:10 | Apr:7 | May:4 | Jun:2 | Jul:2 | Aug:5 | Sep:10 | Oct:11 | Nov:10 | Dec:15

Event impacts:

- 🔥 Valentine's Day: +201% (24 units vs 8 normal)
- ✅ SuperBowl: +71%
- ✅ Halloween: +57%
- 🇺🇸 Independence Day: -65%

Story: Dual-trigger product — spikes on Valentine's Day (+201%) AND has a strong winter/spring seasonal arc. Peaks in Feb (Valentine's) and Dec, drops to near-zero in summer. Perfect for showing both event AND seasonal effects on one product.

Product 4 — FOODS_3_008 | Vanilla Ice Cream

Field	Value
Department	FOODS_3
Stores	All 10
Total sold (5 yrs)	~27,900 units
Avg units/day	14.6
Seasonal CV	0.49
Zero-sales days	48.0%
Peak month	August — 26.0 units/day
Trough month	March — 5.0 units/day
Peak/Trough ratio	5.2x

Monthly pattern:

Jan:12 | Feb:6 | Mar:5 | Apr:7 | May:13 | Jun:22 | Jul:24 | Aug:26 | Sep:26 | Oct:15 | Nov:14 | Dec:11

Event impacts:

- 🔥 Labor Day: +150% (37 units — summer's last holiday)
- ✅ Memorial Day: +48% (summer kickoff)
- ✅ Independence Day: +39%
- 🇺🇸 Valentine's Day: -62%
- 🦃 Thanksgiving: -58%

Story: Classic summer product. Builds from March through August, peaks at Labor Day (+150%), then drops in winter. Perfect inverse of Hot Cocoa. The summer holiday events (Memorial Day, Independence Day, Labor Day) all show positive spikes.

Product 5 — FOODS_3_073 | Hot Cocoa Mix

Field	Value
Department	FOODS_3
Stores	All 10
Total sold (5 yrs)	13,559 units
Avg units/day	7.1
Seasonal CV	0.66
Zero-sales days	77.5%
Peak month	February — 13.8 units/day
Trough month	July — 0.2 units/day
Peak/Trough ratio	65.7x

Monthly pattern:

Jan:12 | Feb:14 | Mar:8 | Apr:0 | May:5 | Jun:2 | Jul:0 | Aug:8 | Sep:11 | Oct:7 | Nov:5 | Dec:14

Event impacts:

- 🔥 Valentine's Day: +123% (15 units — hot cocoa + Valentine's = perfect)
- 🕯️ Memorial Day: +113%
- 🍂 Thanksgiving: +78%
- 🏀 NBA Finals Start: +72%
- 🇺🇸 Independence Day: -97% (nobody wants hot cocoa in July)
- 🎄 Christmas day itself: -100%

Story: Sells nothing in summer (April: 0, July: 0.2). Strong in winter months. Perfect inverse of ice cream — when one peaks, the other troughs. The 65.7x peak/trough ratio is the most dramatic in your list.

Product 6 — FOODS_2_022 | Tortilla Chips (Party Size)

Field	Value
Department	FOODS_2
Stores	All 10
Total sold (5 yrs)	19,558 units
Avg units/day	10.2
Seasonal CV	0.20 (mostly flat)
Zero-sales days	23.5%
Peak month	February — 13.9 units/day
Trough month	May — 7.2 units/day
Peak/Trough ratio	1.9x
Price range	\$4.97 — \$7.47 (avg \$7.05)

Monthly pattern:

Jan:13 | Feb:14 | Mar:13 | Apr:9 | May:7 | Jun:9 | Jul:8 | Aug:9 | Sep:9 | Oct:10 | Nov:11 | Dec:12

Event impacts:

- 🏈 SuperBowl: +136% (24 units vs 10 normal) — the defining event
- 🍂 Valentine's Day: +35%
- 🍂 Thanksgiving: -82%
- 🇺🇸 Independence Day: -61%

Story: Flat year-round with one massive spike — SuperBowl Sunday. Sells 2.4x normal on SuperBowl day. This is the purest event-driven product in your list. Great for showing the model captures one-day spikes that are invisible in monthly averages.

Product 7 — FOODS_3_586 | Fresh Whole Milk

Field	Value
Department	FOODS_3
Stores	All 10
Total sold (5 yrs)	920,242 units (highest in list)
Avg units/day	481 units/day
Seasonal CV	0.10 (very stable)
Zero-sales days	0.1% (sells every single day)
Peak month	August — 587 units/day
Trough month	January — 390 units/day
Peak/Trough ratio	1.5x
Price range	\$1.48 — \$1.68 (very stable)

Monthly pattern:

Jan:390 | Feb:444 | Mar:436 | Apr:445 | May:462 | Jun:501 | Jul:526 | Aug:587 | Sep:502 | Oct:496 | Nov:493 | Dec:512

Event impacts:

- ✔ Thanksgiving: +55% (people buy milk for cooking)
- ✔ Labor Day: +30%
- ✔ Mother's Day: +27%
- ✘ Christmas day: -99% (stores closed)

Story: The most reliable product in the dataset. 920,000 units sold, sells every day, barely varies. Perfect stable baseline. Even "stable" milk shows +55% on Thanksgiving — a hidden insight your model will catch.

Product 8 — FOODS_3_080 | Sliced White Bread

Field	Value
Department	FOODS_3
Stores	All 10
Total sold (5 yrs)	262,650 units
Avg units/day	137 units/day
Seasonal CV	0.08 (flattest in entire list)
Zero-sales days	0.1%
Peak month	August — 156 units/day
Trough month	January — 114 units/day
Peak/Trough ratio	1.4x
Price range	\$1.48 — \$1.68

Monthly pattern:

Jan:114 | Feb:127 | Mar:127 | Apr:133 | May:141 | Jun:148 | Jul:149 | Aug:156 | Sep:138 | Oct:141 | Nov:138 | Dec:140

Event impacts:

- ✔ Independence Day: +23%
- ✔ Labor Day: +16%
- ✔ Thanksgiving: +11%
- ✘ Christmas day: -99%

Story: The most predictable food product in the dataset. Seasonal CV of 0.08 — nearly a flat line. Perfect for showing the model handles boring, stable inventory replenishment. Declining yearly trend (57,886 in 2011 → 40,902 in 2015) is also interesting — shows long-term demand erosion.
